Hi Pranav,

Thi

Datasets.zip

s week, we have successfully completed the search progress of the datasets and we have curated a comprehensive list of relevant resources for our project's next phase. The compiled datasets cover a range of eye tracking and authentication tasks, and we are preparing for detailed analysis and preprocessing in the upcoming week.

If you have any further instructions or specific requirements regarding dataset selection, please let us know.

Best Regards,
Team No.4

Hello,

Okay. If the data sets are ready then it's a nice time to start with the implementation.

BR
Pranav
