Hello Pranav,.

We would like to inform you that we have completed this week’s task for our project — the implementation of the **Convolutional Neural Network (CNN)** model for classifying the **eye state** into five categories: *up, down, left, right, and up*.

The model has been successfully set up and tested with preliminary results. We will continue refining its performance and move on to the next phase as per our project plan.

The **Jupyter Notebook exported document** has been attached for your reference.

Best regards,
Darshan Saravari
On behalf of the project team-4

Hello Darshan,

Thanks for the updates and keep up the work.
The updates looks promising looking forward to see it working

Thanks and regards
Pranav
